

ChristianSteven Software delivers advanced Business Intelligence (BI) solutions that solve mission-critical large enterprise needs and includes reporting, distribution, scheduling, dashboards and automating business processes. Information and insight is delivered intelligently to all stakeholders including management, employees, partners and customers. Our solutions aim to unleash the power of your data and transform the way you do business.

The CSS Business Intelligence solution helps a wide-array of businesses streamline their operations, increase productivity and reduce costs. Cessna has saved over \$1.4 million over the past 7 years. Provident Financial saves over 720 hours a year and use ChristianSteven Software Business Intelligence across 40 regions and 7 divisions. NextGen Healthcare also saves over 520 hours a year and received a ROI payback in less than 3 months. Extraordinary service and support for our customers is paramount which is why over 95% of our customers continue a long-term relationship with us.

BI Continuum
